CARFAX History Impact

Accidents, service records, number of owners and many other history factors can impact a vehicle's value. The CARFAX History Impact is a tool that analyzes millions of used car transactions to measure how the combination of all the information reported to CARFAX impacts the value of a particular vehicle. The vehicle's retail book value plus the CARFAX History Impact will give you a more accurate measure of the vehicle's value. Use this tool, along with a vehicle inspection and test drive, to make a better decision about your next used car.

First Owner

When the first owner(s) obtains a title from a Department of Motor Vehicles as proof of ownership.

Mileage Inconsistency

If a more recent odometer reading is less than an older reading but CARFAX is uncertain whether the discrepancy is a rollback or a clerical error, then CARFAX calls it a "Mileage Inconsistency". In this case, you should verify the mileage with your dealer or a qualified mechanic.

New Owner Reported

When a vehicle is sold to a new owner, the Title must be transferred to the new owner(s) at a Department of Motor Vehicles.

Ownership History

CARFAX defines an owner as an individual or business that possesses and uses a vehicle. Not all title transactions represent changes in ownership. To provide estimated number of owners, CARFAX proprietary technology analyzes all the events in a vehicle history. Estimated ownership is available for vehicles manufactured after 1994 and titled solely in the US including Puerto Rico. Dealers sometimes opt to take ownership of a vehicle and are required to in the following states: Maine, Massachusetts, New Jersey, Ohio, Oklahoma, Pennsylvania and South Dakota. Please consider this as you review a vehicle's estimated ownership history.

Title Issued

A state issues a title to provide a vehicle owner with proof of ownership. Each title has a unique number. Each title or registration record on a CARFAX report does not necessarily indicate a change in ownership. In Canada, a registration and bill of sale are used as proof of ownership.

CARFAX DEPENDS ON ITS SOURCES FOR THE ACCURACY AND RELIABILITY OF ITS INFORMATION. THEREFORE, NO RESPONSIBILITY IS ASSUMED BY CARFAX OR ITS AGENTS FOR ERRORS OR OMISSIONS IN THIS REPORT. New Car Test Drive Review

NewCar **TestDrive**.com

Category:

Summary:

Review:

Wild in suburbia, mate.

By Dan Lyons, NewCarTestDrive.com

Subaru's line of Outbacks can conquer the worst road conditions, and the Outback Wagons continue to serve as sensible alternatives to big, heavy sport-utility vehicles. They are practical, comfortable, useful vehicles.

The VDC and Bean models inject power, luxury and enhanced traction into the relentlessly sensible Subaru lineup. Six-cylinder engines coupled with the latest electronic stability control systems improve safety and increase performance at the same time. Though loaded with features, these top two models are also pricey. At \$31,895, the Outback VDC is priced close enough to invite comparisons with base models from upscale manufacturers, for example, the Volvo Cross Country (\$36,500), Lexus RX300 (\$35,955), and Acura MDX (\$34,370).

The best values in the Outback lineup remain the less expensive and highly competent four-cylinder models, starting at \$22,895.

Overview:

Having released a six-cylinder Outback last year, Subaru has further expanded the line for 2002 with two additional six-cylinder models. Four-cylinder Outbacks continue nearly unchanged.

With either engine, Outback offers an attractive alternative to a bulkier, truck-based sport-utility. Even the powerful six-cylinder versions rate 20/26 mpg city/highway, and while that's not exactly economy-car territory, it's significantly better than the 15/20 mpg you can expect from even a mid-size SUV. Four-cylinder Outbacks deliver more than adequate performance, and get 22/27 mpg.

An Outback won't wring your wallet dry, and it'll ride and handle much better than a truck. Yet it will give you a tall seating position, large cargo capacity, and foul-weather capability. In other words, the Outback will give you most of the positive attributes of an SUV. Unless you're genuinely interested in serious off-road adventure (and most SUV buyers are not), the Outback gives you everything you need. It works great on wet pavement, dirt roads, and on snow and ice. It's even fun to drive on dry pavement. And isn't that really where you drive most of the time?
