

## Programming the Homelink Transponder for MY 2005+

1. Turn ignition to the 'on' position, do not start the engine.
2. Erase all current programming by holding buttons 1 and 3 simultaneously until the red indicator light blinks rapidly
3. Press one of the three buttons you wish to store your remote in. the red indicator light will begin to blink slowly
4. Now go to the front of the car with the remote and hold it at headlight level, press and hold the remote button until the running lights blink 3 times (when you return to your vehicle the red indicator light should be blinking rapidly and then stop.)
  - a. If you have a garage door opener that has a security feature (some will call it 'rolling codes' some will call it 'security plus') you must also perform the following. It helps to have another person.
    - i. Locate the 'learn' button on the back of your opener
    - ii. Press the 'learn' button
    - iii. Have your helper push and hold the button associated with your opener that you just programmed until the red light stops blinking completely.
    - iv. Repeat Step iii until the red light stops blinking again
    - v. You should now be able to open/close your garage door.
