Volume Control Adjustments

Adjusting the radio volume

• **Scroll** the thumbwheel on the **right** side of the multi-function steering wheel to adjust the radio volume

Adjusting the navigation voice volume

• **Press** the thumbwheel on the **right** side of the multi-function steering wheel to hear the navigation voice. **While the navigation voice is active**, scroll the thumbwheel up or down to adjust the voice volume.

WARNING

Driver distraction causes accidents, collisions and serious personal injury!

- Never let yourself be distracted by setting, adjusting or using the Infotainment System.
- Use the Infotainment System only if road, traffic and weather conditions permit, and you will not be distracted from your driving.
- Always set volume levels so that you can clearly hear horns, sirens and other warning sounds outside the vehicle.
